Beacon Hill Water Storage Tank Replacement Project Update for the Week of April 16, 2018

Planned road closures:

Truck and equipment deliveries will require intermittent single lane closures on Longview Road (*between Beacon Hill and Hillcrest Roads*). The Contractor will use a flag person to direct traffic during these times. Please drive slowly in the interest of everyone's safety in the neighborhood.

Upcoming activities:

The Painting Contractor plans to work this Saturday, weather permitting, to apply the intermediate coat of paint to the tank's exterior. This will enable the containment bonnet to be removed from the top of the tank.

During the upcoming week, the Painting Contractor will sandblast and apply primer to the tank's interior. They will then complete the intermediate prime coat on the tank's exterior.

For additional information:

We have designated our consulting engineer, Michael Savarese, as our project contact person who will be able to address concerns 24/7. Mr. Savarese can be contacted at 516.364.9890 (office), 631.241.1757 (cell) or by email at msavarese@db-eng.com. Our website will be updated to provide construction activity information in advance. Please visit <http://pwwd.org/current-projects/> to obtain the latest project information. We will also email updates and information to the community. If you would like to join our email list for project updates and information, please provide your name, street address and e-mail address to info@pwwd.org or call our office at 516.767.0171.

Feel free to contact our Superintendent at 516.767.0171 if you should have any questions or require any additional information.

Sincerely,

David Brackett, *Chairman*

Peter Meyer, *Secretary*

Mindy Germain, *Treasurer*

Paul J. Granger, P.E., *Superintendent*
